

## INSERTING MATLAB FIGURES

1. Type *print\_space-tiff\_spacedeps(c)\_spacefigure.eps* in the MATLAB Command window under current working directory.

### Note:

- (1) If you want a color figure, you need to type “c” after “deps”, i.e. depsc or you just type “deps”.
  - (2) You can put the above command in your MATLAB codes or type the command in the Command window.
2. Go to Word document. Click on Insert →Picture → from file.....
  3. Select files with “.eps” to insert figures.
